# Priyal Josan

**Application Support | Production Support | Operations Analyst**

Gurgaon, Haryana | LinkedIn | GitHub | Portfolio

## PROFESSIONAL SUMMARY

Support professional with 1 year of experience handling Google Pay for Business queries, including payments, document verification, account issues and Soundpod device support. Skilled in raising and tracking bugs through Buganizer, root-cause analysis and SLA-driven ticket resolution. Working knowledge of SQL, Excel and Claude AI for data analysis and workflow automation. Seeking an Application Support, Production Support or Operations Analyst role.

## SKILLS

**Technical:** SQL (SELECT, JOIN, GROUP BY, subqueries), Advanced Excel (Pivot Tables, XLOOKUP/VLOOKUP, formulas, dashboards)
**Tools:** Buganizer (bug tracking), internal Google tools (case assignment, Soundpod troubleshooting, QR kit delivery tracking, merchant account and verification lookup), Claude AI (analysis, documentation, automation)
**Domain:** Digital payments, merchant onboarding, document verification, Soundpod device support
**Core strengths:** Root-cause analysis, incident handling, SLA management, written communication

## WORK EXPERIENCE

**Google Pay for Business Support Specialist, Cognizant** Nov 2025 – Present

- Resolve 30+ merchant tickets per day related to payments, settlements, account access and device issues within defined SLAs.
- Verify merchant documents and identity details, maintaining 98% accuracy and quality score.
- Raise and track 25+ product bugs through Buganizer with clear reproduction steps, coordinating follow-ups with engineering teams.
- Diagnose recurring issues, identify root causes and suggest fixes that reduced repeat contacts by 15%.
- Troubleshoot Soundpod device and connectivity issues for merchants through voice support and email.
- Use Claude AI to draft clear responses, summarise cases and speed up routine documentation.
- Tools used: Buganizer for bug tracking, plus internal Google tools for case assignment, Soundpod device troubleshooting, QR kit delivery tracking, and merchant business account lookup (transactions, bank account details, business information and verification status).

## OTHER EXPERIENCE

**Freelance Fashion Stylist, Self-employed** Oct 2021 – Jun 2025

Delhi and Remote

- Managed end-to-end client projects with photographers, designers and vendors under tight event deadlines.
- Handled on-site issues and last-minute changes during live shoots and shows.

## PROJECTS

**COVID-19 Data Exploration (SQL, Excel) | Link**

- Cleaned and standardised raw global COVID-19 datasets in Excel.
- Used SQL to analyse infection and death rates by country and continent.
- Calculated the percentage of population infected and vaccinated using window functions.
- Created views and temporary tables to simplify visualisation and reporting.

**COVID-19 Data Visualization (SQL, Tableau) | Link**

- Built an interactive Tableau dashboard of global COVID-19 trends from SQL-based exploration.
- Aggregated total cases, total deaths and global death percentage in SQL.
- Identified countries with the highest death toll and infection rates per population, and highlighted daily infection peaks across regions.

**Blinkit Sales Dashboard (Power BI) | Link**

- Transformed raw sales data into a structured data model for an interactive Power BI dashboard.
- Added slicers for outlet location, size and item type, and KPIs for total sales, average rating and item visibility.
- Analysed sales trends by fat content, outlet type and tier-level location using charts and custom visuals.

## EDUCATION

**M.Sc in Fashion Designing, Asian School of Media Studies, Noida (NIU)** 2021 – 2023

**Bachelor of Computer Applications (BCA), Baba Farid Group of Institutions, Bathinda (Punjabi University, Patiala)** 2018 – 2021
